CONTRACTOR OPPORTUNITIES

Some of our most successful distributors today started out in the contract cleaning industry. Once introduced to the Phoenix Program, they quickly recognized the benefits of the system. Already in the floor care business, they had contacts to make sales. Today, many of them have grown their business into a nicely sized janitorial supply house and have greatly increased their income. The Phoenix System is the kind of program that can do this for anyone with drive, ambition and a little capital to get started.

The program is fun to demonstrate and can show superior results in just one or two applications. Best of all, once the sale is made, you'll have many customers for a long time to come.

If you are interested in growing your business in new directions, call us for literature, product information or a demonstration.

**THIS IS A BUSINESS OPPORTUNITY THAT COULD
CHANGE YOUR LIFE.**
